

water to the Superintendent, Pima Agency.

**§ 171.8 Surface drainage.**

(a) The water users will be responsible for all waste water resulting from their irrigation practices and for its conveyance to project canals, drains, wasteways or natural drainage channels. Any expenses involved in doing this will be borne by the water user. Waste water may be emptied into project constructed ditches only at points designated by and in a manner approved by the Officer-in-Charge. In those situations involving two or more landowners and/or water users, it is their responsibility to work out a satisfactory arrangement among themselves for the conveyance of their waste water to project ditches or natural drainage channels.

(b) Waste water shall not be permitted to flow upon or collect in road or project rights-of-way. Failure to comply with this requirement could result in the Officer-in-Charge refusing the further delivery of water.

**§ 171.9 Structures.**

(a) All structures, including bridges or other crossings, which are necessary as a part of the project's irrigation and drainage system will be installed and maintained by the project.

(b) During the construction of a new irrigation project or the extension of an existing project, bridges, crossings or other structures may be built by the Officer-in-Charge for private use where justified by severance agreements or other practical considerations. Title to these structures may or may not be vested in the United States depending upon the agreement with the landowner. Structures built partially or wholly in lieu of severance damages may be required to be maintained by the landowner even though title remains with the United States.

(c) After a project is completed, additional structures crossing or encroaching on project canal, lateral or drain rights-of-way which are needed for private use may be constructed privately in accordance with plans approved by the Officer-in-Charge or by the project. In either case the cost of installing such structures will not be at the

project's expense. Such structures will be constructed and maintained under revocable permits on proper forms issued by the Officer-in-Charge of the irrigation project to the party or parties desiring such structures.

(d) If it is determined that a crossing constructed for and by the project is no longer needed for operation and maintenance of the system. It should be removed. However, if a private party, corporation, State, or other Federal entity desires to use the crossing, it may be transferred to such entity by the Officer-in-Charge under a permit which relieves the United States from any further liability or responsibility for the crossing, including its maintenance. The following provisions pertain:

(1) Permits issued in such situations shall stipulate what is granted, and accepted by the permittee on the condition that the repair and maintenance of the structure shall be the duty of the permittee or his successors without cost to the irrigation project.

(2) The permit shall further provide that if any such structure is not regularly used for a period of one year or is not properly maintained, the Officer-in-Charge may notify the person responsible for the structure's maintenance either to remove it or to correct any unsafe conditions within a period of 90 days.

(3) If the structure is not removed or the unsafe condition corrected within the time allowed, it may be removed by the Officer-in-Charge, the cost of such removal to be paid by the party responsible for the maintenance of the structure.

**§ 171.10 Fencing.**

Fences across project rights-of-way will not be constructed without the approval of the Officer-in-Charge. The granting of such approval shall be dependent upon proper installation so as not interfere with the flow of water or the passage of project operators and equipment. In case an unauthorized fence is installed, the landowner shall be notified to remove it. If it is not removed within a reasonable period of time or satisfactory arrangements made with the Officer-in-Charge, it
